SUMMARY

Technology enthusiast with technical knowledge in backend development using tech stacks such as PHP, Vue.js, Node.js, Express, MongoDB, MySQL, etc. Excited by the prospect of developing scalable and reliable solutions that solves real world problems. Can work well in an individual or team environments, with minimal supervision.

EDUCATION

Obafemi Awolowo University   **Ile-Ife, Osun State, Nigeria**
B.Sc. Computer Science with mathematics   April 2017 - January 2022
CGPA – 4.2 / 5.0

EXPERIENCE

Backend Developer.   **June 2022 – Present**
SaverTech Limited, Ibadan, Nigeria.   Ibadan.

- Successfully implemented a new payment gateway that improved the checkout experience for customers and increased conversion rates by 15%
- Reduced the response time of the search page by 30% through the optimization of database queries and the use of caching techniques
- Led team of 4 developers to build a solution for real-estate (proptech) using PHP and Vue.js
- Defines product requirement and creates high level architectural specifications of an electronics e-commerce solution.

Backend Intern.   **February 2022 – June 2022**
SideHustle, Nigeria.   Lagos.

- Collaborated with team of 5 to build the backend logic for a real estate web app using JavaScript, Node.js, Express and MySQL.
- Developed a new authentication service that improved the user experience and reduced login failures by 75%. This was accomplished through the use of modern authentication techniques such as two-factor authentication and passwordless login

Information and Digital Technology Intern   **September 2019 – February 2020**
British American Tobacco, Nigeria   Ibadan.

- Automate IT asset inventory and IT asset deployment using Microsoft PowerApps for easy asset tracking which reduced the stress of locating IT asset by 100%.
- Teamed with plant personnel, vendors, and contractors to resolve connectivity problems in day-to-day plant operations.
- Implemented a network segmentation scheme that improved the security of the network by limiting the spread of malware and reducing the impact of network attacks using technologies such as VLANs, firewalls, and VPNs.
- Monitored and diagnosed system problems, network connectivity issues, hardware failures, fixed hardware issues.
- Performed periodic system and network upgrades which reduce failure rate by 50%.

Software Engineer Intern   **May 2018 – August 2018**
Software Studio Laboratory, OAU.   Ile-Ife.

- Teamed with 5 interns to build a web app using HTML&CSS, JavaScript, Node.js and MongoDB.
- Collaborated with team of 5 interns to deliver a project that help students schedule appointment with lecturers
- Translated business process of student lecturer appointment booking into program logic using Node.js for backend implementation which was extended to an API to allow for interactions.

TECHNICAL SKILLS

- **Computing:** Python, HTML, CSS, JavaScript, Node.js, SQL, MongoDB, Git, PHP, MySQL, VueJs, AWS.
- **Professional:** Software Development Lifecycle, Requirement Gathering. SDLC.
- **Languages:** English (fluent), Yoruba.

CERTIFICATIONS

- Certified Secure Computer User. EC Council, January 2022.
- Web Development Course (Node.js). Progate, February 2022
- Server-side Development with Node.js, Express and MongoDB. Cousera, March 2022.
- AWS Cloud Practitioner, August 2022.
- Building Modern Node.js Application on AWS. Cousera, December 2022
